SPIN-DOWN

**COMPACT.
CAPABLE.
CONSISTENT.**

The CM1385 delivers reliable fixed-speed spin-down in a truly mini benchtop footprint.

- Fixed speed — simple, consistent every time. Microtubes and PCR strips compatible.
- Ultra-compact design saves bench space.
- Ideal for molecular biology and biochem.

Mini Centrifuge

The CM1385 Mini Centrifuge is designed for quick spin-down operations in molecular biology, biochemistry, and general laboratory settings. Its ultra-compact footprint makes it the ideal solution for busy bench environments and shared spaces. Compatible with standard microtubes and PCR strips, the CM1385 delivers fast, consistent results every time.

SPEED

FIXED

Zero drift. Consistent results on every run.

TUBE COMPAT.

MICRO + PCR

Standard microtubes and PCR strips supported.

FOOTPRINT

ULTRA-COMPACT

Fits any bench — ideal for shared lab spaces.

APPLICATIONS

MOL. BIO + CHEM

Spin-down, clarification, reagent collection.
